DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 1-2 in Paper filed 12/3/2003 is acknowledged. The traversal is on the ground(s) that additional searching would not be an undue burden to the examiner. This is not found persuasive because art anticipating and/or rendering obvious a compound would not necessarily anticipate and/or render obvious a process for making that compound. Thus the examiner would have to continue searching and this would be an undue burden.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jerussi et al (WO 00/32555).

The claimed invention is drawn to white crystal of venlafaxine and venlafaxine in a purity of greater than 99.3%. The prior art generally teaches that venlafaxine is a well-known compound useful for treating depression.

Applicants acknowledge that the compound is known. See page 1, last paragraph of the specification.

Jerussi et al on page 23 disclose venlafaxine. The purity appears to be less than what is presently claimed and the color is not white. Therefore, the prior art differs by not teaching the same purity of the claimed compound.

However, this difference is not patentable. It would have been obvious to one having ordinary skill in the art at the time application was made to have used well-known techniques of purification, in order to make a very pure composition of venlafaxine. One skilled in the art would be motivated to make a very pure composition of venlafaxine to eliminate the possibility of side effects that might be associated with the impurities. Furthermore, it has been well established that the mere purity of compound, in itself, does not render a substance unobvious Ex parte Gray (BPAI 1989) 10 PQ2D 1922.
